

The Secma F16 roadster is a fully factory-produced M1 category vehicle made for good, clean fun on the road and offers the fusion of Ariel Atom's aggressiveness and Lotus Caterham's thrills at a fraction of the cost.

The 1.6 litre Renault four-cylinder engine powering the Secma F16 track car, produces just 105 HP, but it's mounted in the back for 40/ 60 front/ rear weight distribution and Porsche-like handling.

With an only 1.6 litre engine, it won't break the bank and will get you from 0 to 60mph in less than 5.9 seconds. This car is fully roadworthy thus a valid license is required to drive this roadster.

Secma F16 SPECIFICATIONS

ENGINE	Renault 1598cc, water-cooled, 16 valves, fuel injection 4 cylinder
TORQUE	148Nm @ 3750rpm
TRANSMISSION	Rear wheel drive Renault 5-speed manual with reverse
